EDUCATION:

University of California, San Diego: B.S. in Computer Engineering - June 2022

PROJECTS:

[PowellDoro Website](#) - Pomodoro Technique Timer

Role: UI/UX Designer

- Created a fully responsive user interface for a website (HTML, CSS) that helps individuals focus on their work with a to-do list and a pomodoro timer.
- Built features using a modular structure (Javascript) centered on an eventbus that made it simple to add or remove features without affecting other pieces of code.
- Collaborated with a team of 9 using the AGILE practices of daily stand-ups, weekly sprints, peer-reviewed PRs, and a CI/CD pipeline.
- Utilized real user feedback to iteratively improve the website by modifying existing features and creating new ones.

ChoreTracker Website - Chore Organization Application

Role: Full-Stack Developer

- Collaborated with a team of 4 to create a product that has both hardware and software components.
- Built the entirety of a website (HTML, CSS, Javascript) that allows parents to assign their children chores and monitor the progress of those chores through various internet-enabled sensors.
- Utilized Python to run servers, make server requests to load different pages and generate SQL queries from a database server.

TECHNICAL SKILLS:

Languages: HTML/CSS, Javascript, Python, SQL, C++, Java, ARM/MIPS, React.js

Development: Git, Visual Studio Code, Google Collab, Docker, Miro, Slack

Experience: CI/CD Pipeline, RESTful routes, Database Servers, AGILE, JSON

SOFT SKILLS:

Adaptable: I enjoy learning and welcome feedback, and can work independently or in groups

Communication: I have often needed to move conversations forward in group projects with important questions and clear responses (*in English or Spanish*)

Problem-solving: I love solving logic puzzles and I'm great at quickly figuring out solutions
